

Ubuntu add to server local site

```
ssh -oHostKeyAlgorithms=+ssh-dss root@192.168.0.1
```

```
~/.ssh/config
```

```
Host nas (kancellocal)
```

```
    HostName 192.168.0.1
```

```
    HostKeyAlgorithms=+ssh-dss
```

Check ssh key

```
ls ~/.ssh/id_rsa ~/.ssh/id_rsa.pub
```

Generate key pair

```
ssh-keygen -t rsa -b 4096
```

Copy to server

```
ssh-copy-id user@remote-server
```

or copy manually

```
cat ~/.ssh/id_rsa.pub | ssh user@remote-server "mkdir -p ~/.ssh && cat >> ~/.ssh/authorized_keys"
```

check server configuration:

```
sudo nano /etc/ssh/sshd_config
```

restart sshd

```
sudo systemctl restart ssh
```
