PrintEQ errors

'Call to a member function addResult() on bool'

// ensure we have a valid Calculation object (calculatePrint may return false on error)

```
if (!is_object($calculation) || !method_exists($calculation, 'addResult')) {
```

```
$tmp = new Calculation();
```

```
$tmp->errors[] = 'Chyba při výpočtu tisku';
```

```
$calculation = $tmp;
```

```
}
```
