

Správa serveru

ssh and rsync without password

```
ssh-keygen -t ed25519 -C "ubuntu-to-debian-rsync"  
ssh-copy-id user@debian_server_ip
```

(Volitelné) Explicitní SSH klíč Pokud máš více klíčů:

```
rsync -avz -e "ssh -i ~/.ssh/id_ed25519" /data/ user@debian:/backup/data/
```

(Doporučeno) Omezení klíče jen na rsync

Na Debian serveru v authorized_keys:

```
command="rsync --server --daemon ." ssh-ed25519 AAAA...
```

nebo aspoň

```
from="IP_UBUNTU" ssh-ed25519 AAAA...
```
