

Nextcloud gridview

Display Grid View as default in shared links

1. Open `core/js/public/publicpage.js`.
2. Inside the `window.addEventListener('DOMContentLoaded', function () { closure, add the JS.`
3. Save.

Append `#view-grid` to any shared URL.

For example...

`https://YourDrive.com/s/daBAWTg3aa3FMLS#view-grid`

```
// Execute if onlyOnViewGrid is false or if the URL hash is "#view-grid"
```

```
let onlyOnViewGridUrl = true;
```

```
if (!onlyOnViewGridUrl || (onlyOnViewGridUrl && window.location.hash === "#view-grid")) {
```

```
    $('#view-toggle').removeClass('icon-toggle-pictures').addClass('icon-toggle-filelist');
```

```
    $('.files-filestable').addClass('view-grid');
```

```
}
```
